

CUSTOMER CONTROL - SWITCH™

The Switch provides customer controlled, high-definition, video and Ethernet transport services, between 53 major media markets across the U.S., the U.K., Canada, France, Switzerland, Singapore, Australia and New Zealand and 175+ Sports Venues. Our award-winning*, touch-screen, control software SwitchIT, allows customers to create local or long distance orders immediately, or reserve a feed for the future. In 2016, The Switch was awarded a U.S. patent for its Customer Controlled Video Network.

SwitchIT provides customers with two ordering methods: "Classic", which provides single page ordering, and "XprsIT" which provides a graphical step-by-step method. Both offer a convenient way to schedule local, or Inter-City on Demand (ICOD) - The Switch's long distance service or The Switch FiveNines Service, which offers the first fully protected, venue-to-Master Control solution for HDTV and scalable Ethernet transport, always featuring 1+1 redundancy.

Highlights:

- Awarded U.S. Patent # 9306873
